Fully Work Authorized • (US Citizen)

Portfolio: <http://www.hmdroh.com>

Summary:

- Full stack senior software engineer with more than 10 years of experience in Frontend and Backend development such as, TypeScript, Next.js, Webpack, Tailwind CSS, Git, React, Node, Python, Jest, Playwright, MongoDB, AWS, MySQL, Redux, RESTful APIs, ES6, GraphQL, PHP, AWS EC2, Linux.
- Senior Software Engineer at PayPal from the past 6 years, with up to date knowledge of Full stack application. Such as AI integration with the frontend and backend and also data science knowledge.
- Strong in communication, project management with past experience with managing large teams in an organization.

Key Technical Skills:

- Typescript, HTML5, CSS3, Javascript, ES6, Node.js, React.js, Redux, Redux Sagas, Python, Gastby, Next.js, ORM, API, MCP and GraphQL.
- Automation scripts, Tailwindcss, jQuery, Bootstrap, Babel, D3, JSON APIs and Ajax, RESTful API, JWT, Redis. Next Auth, SSO, Vercel SDK, Creating new SDKs, and UI components, Expo mobile app development with React Native.
- MySQL, SQL, MongoDB, Supabase (Postgres), ORMs like Mongoose.js, Prisma, Express.js, Sequelize.js.
- Internal PayPal frameworks like: Kraken apps, Express typhon apps, GraphQL apps, Herald, Nextjs, Adobe AEM, AJO.
- Git Version Control, Graphic Designing, UX Design, JSX, MERN Stack. Email creation with React.js, NPM. CI/CD pipelines (Jenkins), Harness, MCP server development, OpenAI, Gemini, Proplexity AI, n8n automation.
- Functional and Unit Testing with Jest, Playwright, Chai, Responsive CSS, Figma for development, Algorithms.
- AWS EC2 Administration, Route 53, S3, AWS Lambda, SQS, AWS SDK, AWS MediaConvert, Google Cloud, Linux, Shell and SSH Commands, System Architecture and Design, Data Structures.
- Microsoft Office, A+ Hardware, Network Administration, And Project Management Skill

Portfolio:

- **iClasser App** – iclasser.com (Web and Mobile) - Learning platform built with a modern full-stack architecture and scalable infra.
- **inkdes.com** - (SaaS) Email design studio for no coders and email marketing platform for developers and companies, and developed its NPM components package (@inkdes-email/components), Built with Nextjs typescript and Nodejs.
- **@inkdes-email/components** NPM package - InkDes react email components library for creating emails, which are well tested for email compatibility in many devices.
- **Afghan School 7** - (iOS app) On iOS - Expo typescript React-Native.
- **Scheduling Software** (3sbrows.com) - Scheduling appointment In Typescript Next.js (Sends SMS reminder using AWS SNS)
- **farsales.com** (2016) Online store for Afghanistan built with PHP Magento. (can be seen in internet Internet Archive)
- **allpresale.org** (2021) – A website for tracking crypto currency pricing. (can be seen in internet Internet Archive)
- **karwan.edu.af** - University website with backend roles for each department, admin portal, finance charts, students registration and more.

PROFESSIONAL EXPERIENCE:

PayPal Inc, San Jose, CA **Senior Software Engineer**

June 2021 – present

- Used frontend and backend technology like React, Nextjs, NodeJS, Redux, Typescript and Backend Node and Java. to develop platforms. Which have significantly reduced time of development for the team and product owners.
- Used React to develop components and UI from Figma. And have worked UX designers with product teams to deliver production ready UI.
- Developed the system emails using React by creating a SDK, and now emails are bulletproof across all devices and apps.

- Content migration from the old system to React, Nextjs and Nodejs applications, with localization translation. More than thousand old production dependencies were migrated. An internal tool that I developed also helped the team to do the work quicker.
- Code hygiene with lint, unit test using Jest, and large scale Nodejs application maintenance with being more reliable with API SLAs and large amount of requests of customer facing applications with more than millions of requests per day.
- Have created an internal MCP server for our internal platform, Created Typescript/Python automation scripts, also have created automation tools that use AI to do tasks.
- Release platforms to live, and release live cycle management. Agile management, Scrum, Sprints and Jira and documentation tools.
- Adobe AEM knowledge, migration to new tools.

PayPal Inc (Consultant through Aditi Consulting), San Jose, CA

Sep 2019 – Mar 2021

Node.JS Software Engineer II

- Used Node JS Express and React with TypeScript projects. Have created full stack frontend and backend tools for PayPal. Which has made the org to save significant time in development and going to live.
- Used React.js library to develop email templates. This has significantly reduced debugging and errors when generating emails, Product teams that needed new templates or themes this tool has helped them to develop quicker. Created GitHub webhooks to triggers such as word document conversion to HTML and extracting html content for translation. And this has reduced the non-coder teams and legal teams to save time.
- Have worked with content creators and product developers to generate and migrate legacy email templates to newer latest frameworks such as React. Adobe AEM migration, Jenkins, notifications pipelines, Jira and more.
- Have created Node.js and python scripting tools to boost the content creation and also speed up the team performance with less errors. Worked with legacy XML files migration to the needs of our org, which helped increase our team's performance.
- Used Webpack, GraphQL, Webhooks, Tailwind CSS library, Jest and Tapes.js for functional and unit testing.
- Have used JIRA Agile Management software, and have worked as a scrum master.

Karwan University, Kabul, Afghanistan

Sep 2009 – Jan 2018

Web Developer, Coding Instructor, CEO

- Developed a dynamic website for the university using PHP and MySQL with features like rich-text editable pages by admin role, editable banners, news, events posting, has had student application forms for registration, student's score announcements dashboards, student quizzes online at (www.karwan.edu.af) which made the university one of the first online university. And reporting and auditing were easier than before.
- Managed technology products for the university, have closely managed other developers to develop new features. Collected feedback about the products from our customers (students) and worked towards enhancing our products.
- Developed MIS systems for student records management, created tools for marketing presentations such as Virtual Reality shows for one of the local events about the university. With localization of the content to right-to-left languages. Which has significantly made the team efficient and the system easier to manage.
- Instructed coding classes following technologies: HTML, CSS, JavaScript, PHP, MySQL, MongoDB, Node.js, React.js, Python, Java, AWS.
- Has managed and taught classes in the department named DIT which stands for *Diploma in Information Technology* between (2009-2010). Instructed Web Development Classes such as (HTML, CSS, JavaScript, PHP, MySQL). Which helped me a lot to build fundamentals in web development and backend knowledge.

Education:

Full Stack Web Development Certificate (The Coding Bootcamp)

Graduated in May 2018

University of California San Diego Extensions, San Diego, California, USA

Data Science (Bootcamp)

June 2018

General Assembly – (Online), California, USA

Master's Degree (MIB)

Graduated in 2016

University of Wollongong in Dubai, Dubai, UAE

Bachelor's Degree (B.Sc.)

Graduated in 2012

Kabul University, Kabul, Afghanistan

Computer Short Courses

2001 - 2005

Frough English Language and Computer Center, Kabul, Afghanistan
